Hazardous components : Xylene

**R-phrase(s) :** Flammable. Harmful by inhalation and in contact with skin. Irritating to skin.

**S-phrase(s) :** Do not breathe spray. Avoid contact with skin. Wear suitable protective clothing and gloves.

Version 3

### 4. FIRST AID MEASURES

General advice	:	When symptoms persist or in all cases of doubt seek medical advice. Never give anything by mouth to an unconscious person.
After Inhalation	:	Remove to fresh air. Keep patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice.
After Skin contact	:	Take off all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners. Put shower on working place
After Eye contact	:	Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses. Seek medical advice. Put eye-washer on working place
After Ingestion	:	If accidentally swallowed obtain immediate medical attention. Keep at rest.
		Do not induce vomiting.
RE-FIGHTING MEASURES		Do not induce vomiting.
<b>RE-FIGHTING MEASURES</b> Suitable extinguishing media	:	Do not induce vomiting. Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Keep containers and surroundings cool with water spray.
	:	Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
Suitable extinguishing media Extinguishing media which must not be used for safety	:	Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Keep containers and surroundings cool with water spray.

ACCIDENTAL RELEASE MEASURES			
Environmental precautions	: Try to prevent the material from entering drains or water courses. If the product contaminates rivers and lakes or drains inform respective authorities.		
Methods for cleaning up	<ul> <li>Clean with detergents. Avoid solvents. Contain and collect spillage with non-combustible absorbent material, (e.g. sand, earth, diatomaceus earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).</li> </ul>		
Additional advice	: Refer to section 15 for specific national regulation.		
ANDLING AND STORAGE			
Handling			
Safe handling advice	<ul> <li>Avoid exceeding of the given occupational exposure limits (see section 8).</li> <li>Use only in area provided with appropriate exhaust ventilation. Avoid contact with skin, eyes and clothing.</li> <li>Smoking, eating and drinking should be prohibited in the application area.</li> <li>Avoid inhalation of vapour or mist.</li> <li>For personal protection see section 8.</li> <li>Thoroughly mix before using After using, store in a well-sealed container</li> </ul>		
Advice on protection against fire and explosion	<ul> <li>Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits.</li> <li>When transferring from one container to another apply earthing measures and use conductive hose material.</li> <li>No sparking tools should be used.</li> <li>The product should only be used in areas from which all naked lights and other sources of ignition have been excluded.</li> <li>No smoking.</li> </ul>		
Storage			
Requirements for storage areas and containers	<ul> <li>Observe label precautions. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Solvent vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Electrical installations / working materials must comply with the technological safety standards. Keep away from sources of ignition - No smoking. Store between 5° an 35°C in a dry, well ventilated place away from source of heat, ignition and direct sunlight. Store in accordance with the particular national regulations.</li> </ul>		
Advice on common storage	: Keep away from oxidising agents and strongly acid or alkaline materials.

Hand protection	:	For prolonged or repeated contact use protective gloves. Barrier creams may help to protect the exposed areas of skin, they should however not be applied once exposure has occurred. Skin should be washed after contact. Wash your hands and put on barrier creams				
Eye protection	:	Chemical re	esistant goggl	es must be	worn.	
Skin and body protection	:	Working cl	l be washed a othes must no naviour in cas	ot consist of e of fire.		ich show a dangerous

Personnel should wear protective clothing Workers should wear antistatic footwear.

### 9. PHYSICAL AND CHEMICAL PROPERTIES

Form	:	liquid
Flash point	:	> 23 - 55 °C
Density	:	0,88 g/cm3

### **10. STABILITY AND REACTIVITY**

Conditions to avoid : Our products were manufactured in compliance with safety standards to avoid decomposition and degrading under the defined conditions. Taking the product type into account, it is advisable to leave the product in its original packaging thus avoiding transferring it.

moderate irritation to the eyes and to the nose. Inhaling the vapours can irritate the respiratory system. The vapours can cause headache and	ersion 3	Print Date 14/12/20				
Acute inhalation toxicity       :       Exposure to component solvent vapours concentration in excess of the stated occupational exposure limit may result in adverse health effects.         Such as: mucous membrane irritation, respiratory system irritation, adverse effects on kidney, liver and central nervous system.       Symptoms and signs: headache, dizziness, fatigue, muscular weakness, drowsness and in extreme cases loss of consciousness. Inhalation of airborne droplets may cause irritation of the respiratory tract.         Skin irritation       :       Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in desiccation of the skin. The product may be absorbed through the skin.         Note       :       The concentration of each substance should be borne in mind in assessing the toxicological effects deriving from the preparation.         N-Butyl Acetate       OBSERVATIONS ON HUMAN SUBJECTS: Inhalation: 3300 ppm (16 mg/h), for short periods, cause moderate irritation to the cyes and to the nose. Inhalation: 200-300 ppm (1-14 mg/h), for short periods, cause moderate irritation to the cyes and to the nose. Inhalation: 200-300 ppm (1-14 mg/h), for short periods, cause irritate the respiratory system. The vapours can cause headache and nause. As a liquid it can irritate the eyas and cause derival multisand, if swallowed, causes inebriation, hallucinations and sedation. Symptoms of illness at 500 ppm. Serious toxic effects at 2,000 ppm for 60 min. TCLo: 200 ppm         ECOLOGICAL INFORMATION       :       There is no data available for this product.         DISPOSAL CONSIDERATIONS       :       The product should not be allowed to enter drains, water courses or the s	Hazardous reactions					
whe stated occupational exposure limit may result in adverse health effects.         Such as: mucous membrane irritation, respiratory system irritation, adverse effects on kidney, liver and central nervous system.         Symptoms and signs: headache, dizziness, faitigue, muscular weakness, drowsiness and in extreme cases loss of consciousness. Inhalation of airborne droplets may cause irritation of the respiratory tract.         Skin irritation       :         Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in desiccation of the skin.
