# 1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING **Product information** Product name : ENERGY LINE PLASTIC PRIMER Product code : L0EL0010L0.4 Company : Lechler SpA Via Cecilio 17 22100 Como : +39031586111 Telephone Telefax : +39031586206 In order to get more information and in case of emergencies please address to Lechler Group Security Office. (Tel. +39-031-586.301). : Tel. +39-031-586301 Fax +39-031-586299

## 2. COMPOSITION/INFORMATION ON INGREDIENTS

:

Chemical nature

: Mono compound primer (undercoat)

Hazardous components

Components	CAS-No.	EEC-No.	Symbol(s)	R-phrase(s)	Concentration
					[%]
Toluene	108-88-3	601-021-00-3	Xn, F	R11, R65,	>= 30 - < 50
				R38, R63,	
				R67,	
				R48/20	
Xylene	1330-20-7	601-022-00-9	Xn	R20/21,	>= 1 - < 3
				R38, R10	
DIMETILETERE	115-10-6	603-019-00-8	F+	R12	>= 30 - < 50
GPL			F+	R12	>= 10 - < 12,5

## 3. HAZARDS IDENTIFICATION

Hazardous components : Toluene

**R-phrase(s) :** Possible risk of harm to the unborn child. Harmful: may cause lung damage if swallowed. Vapours may cause drowsiness and dizziness. Irritating to skin. Harmful: danger of serious damage to health by prolonged exposure through inhalation.

### Version

Print Date 14/12/2004

### Extremely flammable.

### S-phrase(s) :

Do not breathe spray. Avoid contact with skin. Wear suitable protective clothing and gloves. Use only in well-ventilated areas. If swallowed, do not induce vomiting: seek medical advice immediately and show this container or label.

## **Exceptional labelling of special preparations :**

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C. Also after use, do not open with force or burn. Do not spray on a naked flame or any other incandescent material. Keep away from sources of ignition - No smoking. Keep away from children.

# 4. FIRST AID MEASURES

5.

General advice	:	When symptoms persist or in all cases of doubt seek medical advice. Never give anything by mouth to an unconscious person.
After Inhalation	:	Remove to fresh air. Keep patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice.
After Skin contact	:	Take off all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners. Put shower on working place
After Eye contact	:	Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses. Seek medical advice. Put eye-washer on working place
After Ingestion	:	If accidentally swallowed obtain immediate medical attention. Keep at rest. Do not induce vomiting.
. FIRE-FIGHTING MEASURES		
Suitable extinguishing media	:	Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Keep containers and surroundings cool with water spray.
Extinguishing media which must not be used for safety reasons	:	Do NOT use water jet.

rsion		Print Date 14/12/2
Specific hazards during fire fighting	:	As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health. Cool closed containers exposed to fire with water spray. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.
Special protective equipment for fire-fighters	:	Wear self contained breathing apparatus for fire fighting if necessary.
CCIDENTAL RELEASE ME	ASU	RES
Environmental precautions	:	Try to prevent the material from entering drains or water courses. If the product contaminates rivers and lakes or drains inform respective authorities.
Methods for cleaning up	:	Clean with detergents. Avoid solvents. Contain and collect spillage with non-combustible absorbent material, (e.g. sand, earth, diatomaceus earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).
Additional advice	:	Refer to section 15 for specific national regulation.
ANDLING AND STORAGE		
Handling		
Safe handling advice	:	Avoid exceeding of the given occupational exposure limits (see section 8). Use only in area provided with appropriate exhaust ventilation. Avoid contact with skin, eyes and clothing. Smoking, eating and drinking should be prohibited in the application
		area. Avoid inhalation of vapour or mist. For personal protection see section 8. Thoroughly mix before using After using, store in a well-sealed container

### Version

Print Date 14/12/2004

Storage		
Requirements for storage areas and containers	:	Observe label precautions. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Solvent vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Electrical installations / working materials must comply with the technological safety standards. Keep away from sources of ignition - No smoking. Store between 5° an 35°C in a dry, well ventilated place away from source of heat, ignition and direct sunlight. Store in accordance with the particular national regulations.
Advice on common storage	:	Keep away from oxidising agents and strongly acid or alkaline materials.

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

## Components with workplace control parameters

Components	CAS-No.	Value [mg/m <sup>3</sup> ]	Value [ppm]	Basis
Toluene	108-88-3	188,00	50,00	
Xylene	1330-20-7	221,00	50,00	

## Personal protective equipment

Respiratory protection	:	Apply technical measures to comply with the occupational exposure limits. This should be achieved by a good general extraction and -if practically feasible- by the use of a local exhaust ventilation. If the occupational exposure limits cannot be met, in exceptional cases suitable respiratory equipment should be worn only for a short period of time.
Hand protection	:	For prolonged or repeated contact use protective gloves. Barrier creams may help to protect the exposed areas of skin, they should however not be applied once exposure has occurred. Skin should be washed after contact. Wash your hands and put on barrier creams
Eye protection	:	Chemical resistant goggles must be worn.
Skin and body protection	:	Skin should be washed after contact. Working clothes must not consist of textiles, which show a dangerous melting behaviour in case of fire. Personnel should wear protective clothing Workers should wear antistatic footwear.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

Form

: aerosol

rsion	Print Date 14/12/20
Flash point	: < -1 °C
Solids by weight	: 1%
STABILITY AND REACTIV	ΙΤΥ
Conditions to avoid	: Our products were manufactured in compliance with safety standards to avoid decomposition and degrading under the defined conditions. Taking the product type into account, it is advisable to leave the product in its original packaging thus avoiding transferring it.
Hazardous reactions	: Keep away from oxidising agents, strongly alkaline and strongly acid materials in order to avoid exothermic reactions.
TOXICOLOGICAL INFORM	ΙΑΤΙΟΝ
Acute inhalation toxicity	<ul> <li>Exposure to component solvent vapours concentration in excess of the stated occupational exposure limit may result in adverse health effects.</li> <li>Such as: mucous membrane irritation, respiratory system irritation, adverse effects on kidney, liver and central nervous system.</li> <li>Symptoms and signs: headache, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases loss of consciousness. Inhalation of airborne droplets may cause irritation of the respiratory tract.</li> </ul>
Note	: The concentration of each substance should be borne in mind in assessing the toxicological effects deriving from the preparation.
Toluene	OBSERVATIONS ON HUMAN SUBJECTS - NON PROFESSIONAL EXPOSURE : Effects due to an acute exposure : A test made on a group of people exposed to 50-800 ppm inhalation for 8 hours gave the following outcome: 200 ppm: light but definite diminution of coordination, time of reaction, weariness, confusion, skir paraesthesia; weariness lasted for hours together with a light insomnia. 400 ppm: worsening of the symptoms and mental confusion. 600 ppm after 3 hours: extreme weariness, mental confusion, loss of control, lacl of coordination, nausea, headache, loss of balance. After 8 hours these symptoms worsen and there is also dilation of the pupil and defects in adaptation to the light. 800 ppm: the same symptoms but much more accentuated.
ECOLOGICAL INFORMAT	ION
Further information	: There is no data available for this product.
