Ready to Use

POWER CAN

GLOSS BLACK

Description

Power Can Gloss Black is a 1K ready to use topcoat in an aerosol. It is used for finishing primed surfaces in order to achieve a high gloss, durable finish.

Power Can Gloss Black is capable of producing a coating of a film thickness similar to that of a spray gun applied topcoat. The convenience of using a high build coating in an aerosol means that masking is kept to a minimum. Mixing paint and cleaning spray equipment are avoided as a result of using **Power Can Gloss Black** leading to savings in time and materials.

Power Can Gloss Black is isocyanate free.

Surface preparation and instructions for use

Power Can Gloss Black can be applied using the preparation procedure shown below: -

Thoroughly clean and degrease surfaces with a suitable spirit wipe or thinner such as U-POL System 20 Degreaser. Abrade primed surfaces wet with 600-800 or dry with 400-600 abrasive, re-clean, dry and degrease.

Application

Shake can thoroughly before use for a minimum of 2 minutes.

Apply 1-2 light even coats.

Allow 5-10 minutes flash off time between coats.

Drying time

Allow 30 minutes before handling.

Drying time is dependent upon film thickness, humidity and temperature.
